

# rijksmuseum DNA wallpaper 15/16

by Irma boom for Droog®

Hang one of 18 famous paintings from the Rijksmuseum on your wall with Colour DNA wallpaper. Renowned graphic designer Irma Boom spent ten years deconstructing the museum's paintings to distill their colour DNA – the six colours that make up the painting. These DNA swatches of an individual painting are available as wallpaper in narrow or broad striping. Just choose and /or combine your favorite classic for your wall.
